

| Case Study

Fire damage to commercial unit in Maidenhead

Background

When a faulty freezer caused a fire in the basement of a fish and chip shop in Maidenhead, the unit and flat above it sustained major fire and smoke damage.

The insurance covered around 80% of the works and the rest was funded by the landlord.

Outcome

A complete refurbishment, structural repairs and new services were installed at the site. The project was completed to the client's satisfaction, within agreed timescales and within budget.
